

## GRAVITY STATION: GI 856 Iceland / Keflavik K

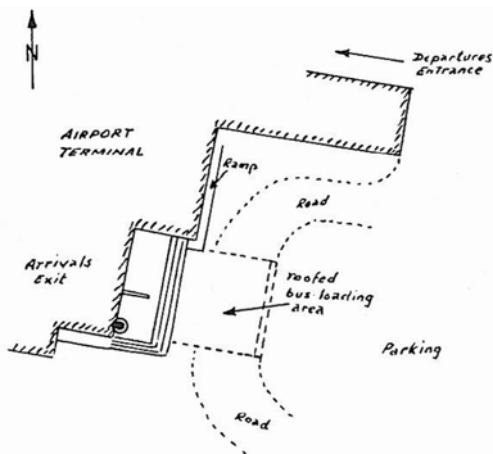

Coordinates (° ' "): 63 59 -22 36

Elevation (m): 50.5

Gravity value (mGal): 982259.43

Monumentation: Bronze plug

Station is located in front of the 4 doors to the right (viewed from inside) at the main exit of the arrivals terminal. Marked by a small bronze plug enscribed "5471" and "1970".

The station is located in front of the 4 doors to the S of the main exit of the arrivals terminal- It is on the concrete surface of the top step, 40cm S of the door and 10cm E of the wall. Although no BM was found in 1968, this station is believed to coincide exactly in elevation and very nearly in location with the original "K" site. In 1982 a 2cm square plug was found at the site which has become the monument for the station.
